Project funding

* indicates a required field

Acute health risk

An **acute health risk** exists when:

- A person living at a property with contaminated soil has an elevated blood lead level (5 µg/dL or higher); or
- A child living at a property with contaminated soil displays pica.

These applications must be supported by blood lead test results and/or a medical certificate.

Applicants satisfying the acute health risk criteria are given priority for funding

Does this application relate to a person with a confirmed blood lead level of 5 µg/dL or higher who resides at a property with lead in soil at concentrations of more than 300ppm? *

- ☐ Yes
☐ No

Does this application relate to children under five years of age who display pica and who reside at a property with lead in soil at concentrations of more than 300ppm? *

- ☐ Yes
☐ No

If you satisfy one of the above health risk criteria please attach blood lead level test results and/or a medical certificate

Attach a file:

Funding for activities where an acute health risk exists

This section should ONLY be completed if you answered YES to one of the above health risk questions.

What activities are you seeking funding for?

Relocation and return costs where the applicant is seeking temporary accommodation within a distance of 100km and plans to return to the property after remediation

- ☐ Yes
☐ No

Acute Health Risk Grant 2022-2026

Form Preview

Up to \$5,000 in total will be provided for relocation and return costs (a proportion of 50% of the rent or a maximum of \$500 per week will be provided for temporary housing for a period of up to twelve weeks)

Temporary housing costs while a property undergoes remediation where an acute health risk exists

- ☐ Yes
- ☐ No

Up to \$6,000 in total will be provided for temporary housing costs

Remediation of land contaminated by lead where an acute health risk exists

- ☐ Yes
- ☐ No
